Master of Jurisprudence in Environmental Law

Define the Environmental Landscape

Gain the legal foundation to navigate today's environmental protections—and the insights to negotiate their future.

Professionals working in industries impacted by environmental regulations face continual change, complying with laws that vary drastically on the state, federal and international levels. From public and private land development to endangered species protections, navigating the patchwork of new and opaque regulations requires both knowledge and confidence. This expertise is equally critical for those working in regulatory agencies, advocacy groups and other organizations influencing public policy and its enforcement.

With a deep understanding gained from our [online MJ in Environmental Law](#), you will be equipped to thrive in large organizations, new startups well as nonprofit groups.

Invest in Tulane Law School

Established in 1847, Tulane University Law School stands as **one of the oldest and highly regarded law schools in the country**. Here, you'll attend classes online and feel confident that you're committing to the quality and credibility of a historic program.

- 12th-oldest law school in the U.S.
- Accredited by the American Bar Association since 1925
- Leader in environmental education since 1979
- First in the country to require pro bono legal work for all JD candidates
- Hub for a powerful network of nearly 12,000 alumni

Admissions Requirements

- Bachelor's degree
- Current resume
- Official transcripts from all colleges or universities attended
- Personal statements
- Two letters of recommendation
- TOEFL scores (if required)

Coursework Designed for Your Career

In as few as two years, build a deep foundation in the laws and regulations that guide today's regulations, from clean air and water laws to land use regulations. Our environmental law program shares some of the same requirements as the MJ in Energy Law, providing students with wide exposure to the full range of legal issues that affect the environment.

Core and elective courses include:

- Energy Law, Regulation and Policy Survey
- Environmental Law, Regulation and Policy Survey
- Environmental Justice and Public Trust
- Pollution Control
- Administrative Law
- Dispute Resolution
- Natural Resources Law
- Hazardous Waste Law
- Clean Air Law
- Clean Water Law
- Law & Climate Change
- Toxic Tort Law
- Water Law & Policy
- Land Use Law
- Ocean and Coastal Law
- Law, Science and the Environment

Match Innovation With Experience

Understanding today's energy and environmental regulations is critical to adapt to what's ahead.

Organizations need guidance to navigate high-profile regulations, such as the National Environmental Policy Act and Clean Water Act, and complicated, lesser-known restrictions on land use, pollution and the use of natural resources.

With the legal knowledge from Tulane Law School, become a critical asset within your field, whether you're guiding your organization through new business strategies or advocating for smarter public policy and environmental regulations.

Our students are prepared to work in:

- Government agencies
- Regulated environmental agencies
- Think tanks and public policy groups
- Energy corporations
- Renewable energy startups
- Environmental advocacy organizations

A Flexible Solution for Working Professionals

Through a combination of live and asynchronous courses, students find the flexibility and faculty support to advance their career on their schedule.

- **Three start dates:** spring, summer and fall
- Graduate in as few as two years
- Combination of live and asynchronous online courses
- Experienced faculty and expert instructors
- Education Immersion Weekend

Connect With Your Peers and Leaders

The [Education Immersion Weekend](#) of Tulane's online MJ in Environmental Law program. Over two days, you will get to know your faculty and peers, while engaging in meaningful conversations on the issues impacting today's environmental protections.

All students are required to attend at least one EIW, held every summer.

**This requirement was cancelled for Summer 2020 due to COVID-19.*
